

InspireLab™

By Juana Technologies Private Limited

Transform Learning with a Seamless, Cost-Effective, Virtual **Computer Lab**

All-in-one virtual computer lab, simplifying infrastructure, enhancing interactive learning, and reducing costs for schools.

What is **InspireLab™**

JUANA™'s InspireLab™ is a plug and play, virtualized, centralized and manageable school/classroom computer lab solution which helps educational institutes to automate classroom/lab computing, reduce upfront hardware costs and also lower TCO over years of usage. The solution is also scalable for expansion and usage.

The solution is based upon Windows® Server with Remote Desktop Services / Hyper V role and Virtualized Windows® Server or Windows 11 OS.

We offer bundled solution package for 10/20/30/40 thin clients, Server hardware with Windows® Server Standard edition for Academic and optionally Windows 11 Virtual desktop hosted on it.

The solution is suitable for schools, educational institutions, university, Government's projects having requirement of computers for their classrooms/student computer labs & any education related requirements.

The InspireLab™ is being offered optionally along with Academic Licenses of Windows® Server Standard edition, CAL & VDA licenses to the education customers.

Plug & Play Setup

Manage and monitor the entire computer lab from a single, centralized interface.

Centralized Management

Manage and monitor the entire computer lab from a single, centralized interface.

Cost-Effective

Reduces upfront hardware costs and lowers total cost of ownership (TCO) over time.

Scalable Solution

Easily expandable to accommodate growing needs, with packages for 10 to 40 thin clients.

Why InspireLab™

“
Revolutionizing
Classrooms with
Scalable,
Cost-Effective,
and Centralized
Computing
Solutions.”

- ✔ **Utility Computing Model:** Enables **Virtualized computing** to deliver services based on an Application Service Providing (ASP) model over a wired or wireless connection
- ✔ **The solution is scalable** across any Closed User Group as well as Public Networks.
- ✔ Ensures **Quality Of Service(QOS)** with **High Reliability & Availability**.
- ✔ The solution ensures fast delivery, **deployment scalability** of terminals
- ✔ **Single point management:** Minimizes site visits for all hardware, OS, software tools, application software configuration thereby reducing the maintenance cost.
- ✔ Ensures **Tamper proof protection** against hackers and undesired usage.
- ✔ **Centralized Management** of all devices.
- ✔ **Reduces device maintenance costs**, by eliminating the need manual maintenance of software, hardware, version upgrades, servicing etc.
- ✔ **Eliminates virus risk**, since the system is hardened and secured, constrained or focused environment where user can access only desired applications.
- ✔ **Eliminates manual software upgrades**, since all upgrades are applied from the server
- ✔ **Simplifies software upgrades**, updates can be scheduled and applied automatically.

Say Yes to the new **Beginnings**

JUANA™ InspireLab™ represents excellent value propositions. Provides sophisticated management features normally provided by high end solutions. Manages all scenarios of school requirements. Provides all efficient, scalable, secure and affordable solutions.
